How To Make A 3D lantern

**Enjoy your colorful,
handmade 3D lantern!**

1. Use the numbered color guide to color each section of the sheet.
2. Match each number to its corresponding color.
3. Carefully cut along the solid outer lines of the lantern pieces.
4. Gently fold along all dashed or indicated fold lines.
5. Make sure folds are neat to help the lantern stand properly.
6. Bring the side panels together to form the lantern shape.
7. Secure the tabs using glue, double-sided tape, or adhesive dots.
8. Hold in place briefly until the lantern is firmly assembled.
9. Set your finished lantern on a flat surface or display it as decoration or do punch holes and attach a string to hang it.
